Our services

Our commercial asbestos removal capabilities

Rapid supports clients throughout the asbestos removal process, including:

Asbestos testing & sampling

We assist clients in identifying suspected asbestos materials through:

- Site inspections
- Material sampling
- NATA-accredited laboratory testing
- Results review and next-step guidance

Where removal work is contracted to Rapid, asbestos testing is provided free of charge.

Clearance & air monitoring coordination

Where required, Rapid coordinates independent professionals for:

- Air monitoring
- Independent clearance inspections
- Clearance certificates

Independent assessments are completed by the appropriately qualified professional responsible for that work.

Asbestos removal & disposal

Our licensed team manages bonded, non-friable asbestos removal projects including:

- Asbestos cement roofing
- Wall sheeting and external cladding
- Eaves
- Fencing
- Flooring and tiles
- Ceiling materials
- Other bonded asbestos products within our licence scope

We manage:

- ✓ Site preparation
- ✓ Safety controls
- ✓ Removal works
- ✓ Packaging and handling
- ✓ Approved disposal
- ✓ Removal documentation

From initial site preparation through to compliant disposal and final documentation, Rapid works closely with clients and project teams to minimise disruption, maintain safety standards and support smooth project delivery.

Safety and compliance

Rapid Asbestos Removals operates with a strong focus on safe work practices, compliance and clear project communication.

Insurance coverage

- ✓ \$20 Million Public Liability Insurance
- ✓ \$1 Million Statutory Liability
- ✓ Workers Compensation Insurance

Project documentation

- ✓ Safe Work Method Statements (SWMS)
- ✓ Job Safety Analysis (JSA)
- ✓ Asbestos Removal Control Plans
- ✓ Certificate of Asbestos Removal
- ✓ Disposal receipts
- ✓ Certificates of Currency for insurance

Licence details:

Class B Asbestos Removal Licence

Licence number: WR2032

Issued under: Work Health and Safety (General) Regulations 2022

Expiry: 15 June 2029

Rapid specialises in **bonded, non-friable** asbestos removal across residential, commercial and industrial environments.

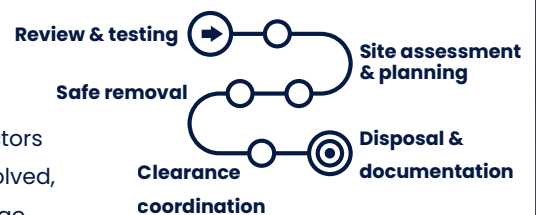

Department of Energy, Mines,
Industry Regulation and Safety

Our removal process

For commercial projects, the removal process needs to account for more than the asbestos itself. Rapid works with clients, builders, contractors and facility managers to understand the site, confirm the materials involved, plan the work around access and operational requirements, and manage removal through to disposal and documentation. Where independent clearance or air monitoring is required, we coordinate with the appropriately qualified professionals to help keep the wider project moving.
